GRAVITY GREYWATER REUSE SYSTEM -

Schematic diagram for **General Grey Water Reuse System** using a Greywater Re-Use Treatment Tank, gravity dispersal through Sub-surface Irrigation into an Effluent Disposal Area (EDA). The EDA is designed to re-use greywater in the root-zone of vegetation. Dispersal pipe can be one continuous length or manifolded as shown in diagram. This system can process the volume of **Greywater** created by up to 6 persons where the soil type is of a **clay-loam** composition. Designed to AS1547-2000. (Diagram is not to scale)
