

ADOBE LOOS & WORMS

Organic Waste & Wastewater Treatment Systems

NATURE LOO COMPACT

The Compact was designed to provide toilet facilities at minimum cost in low volume situations. It is in high demand for week-enders, outdoor work situations and with people needing toilet facilities in temporary accommodation whilst building their home. It is worth noting that the Compact can be converted into the Classic 650 by purchasing some of the Classic 650 components.

Unlike conventional composting toilets it sits on the toilet room floor and requires no space beneath

the floor. The Compact range comes complete with everything required for installation except for the external vent pipe and absorption trench materials, which can be obtained from your hardware or garden shop for about \$80.

Included in the standard Compact 2 Package are:

- 2 composting chambers (55 litres each)
- Black or Marble colour choice
- Black plastic seat
- Ventilation system including 12 or 24 volt 2.8 watt fan and transformer.
- Easy to follow installation and maintenance manual.
- Capacity 1 adult full-time or 2 persons part time use.

Price: See Price List or website

.....

The Compact 3 Package includes all components of the Compact 2, plus 1 extra composting chamber for higher volume use and cooler locations.

- Capacity 2 adult full-time or 3 persons part-time use.

Price: See Price List or website

.....

The Compact 4 Package includes all components of the Compact 2, plus 2 extra composting chamber for higher volume use and cooler locations.

- Capacity 3 adult full-time or 4 persons part-time use.
