

ADOBE LOOS & WORMS

Organic Waste & Wastewater Treatment Systems

NATURE LOO COMPACT

The Compact was designed to provide toilet facilities at minimum cost in low volume situations. It is in high demand for weekenders, outdoor work situations and with people needing toilet facilities in temporary accommodation whilst building their home. It is worth noting that the Compact can be converted into the Weekender by purchasing some of the Weekender components.

Unlike conventional composting toilets it sits on the toilet room floor and requires no space beneath the floor. The Compact range comes complete with everything required for installation except for the external vent pipe and absorption trench materials, which can be obtained from your hardware or garden shop for about \$80.

Included in the standard Compact 2 Package are:

- 2 small composting chambers (54 cm high x 40 cm average diameter). The chambers double up as pedestals.
- Black plastic seat.
- Ventilation system including 12 volt 2.8 watt fan and transformer.
- Easy to follow installation and maintenance manual.
- Capacity 1 adult full-time or 4 person weekends only

Price: \$895 inclusive of GST

The Compact 3 Package includes all components of the Compact 2, plus it has an extra composting chamber for higher volume use and cooler locations.

- Capacity 2 adult full-time or 4 persons part-time use.

Price: \$1095 inclusive of GST
